

Directory Listing Vulnerability was found in the `/lms/db/directory` of the Kashipara E-Learning Management System project v1.0. This vulnerability allows remote attackers to access sensitive files and directories via the URL: `http://localhost/lms/db/`

➤ **Official Website URL**

<https://www.kashipara.com/project/php/13138/e-learning-management-system-php-project-source-code>

➤ **Affected Product Name**

E-learning Management System project in PHP with source code and document

Affected Vendor	kashipara
Affected Code File	/lms/db/
Method	GET
Version	V1.0

Steps to Reproduce:

Step 1: Access <http://localhost/lms/db/> and notice the directory listing contains db file and in future any sensitive files or folder will be accessible without authentication if added more.

Index of /lms/db

Name	Last modified	Size	Description
 Parent Directory		-	
 elearning.sql	2024-10-16 00:19	100K	

Apache/2.4.58 (Win64) OpenSSL/3.1.3 PHP/8.0.30 Server at localhost Port 80

Mitigation/recommendations
